**Vol. 13 No. 1 January–March 1991**

**Innovations and Developments**

1 Being constructive: an alternative approach to the teaching of the energy concept–part two
*Ricardo Trumper*

**Research Reports**

11 Concept mapping and misconceptions: a study of high-school students' understandings of acids and bases
*Bertram Ross and Hugh Munby*

25 Students' versus their teachers' beliefs and positions on science/technology/society-oriented issues
*Uri Zoller, Stuart Donn, Reginald Wild and Peter Beckett*

37 The relationship between African traditional cosmology and students' acquisition of a science process skill
*Olugbemiro J. Jegede and Peter Akinsola Okebukola*

49 The effects of task contexts on pupils' performance in science process skills
*Jinwoong Song and Paul J. Black*

59 Children's interpretation of dissolving
*Ken Longden, Paul Black and Joan Solomon*

69 Towards an ontology of common-sense reasoning
*M. C. Mariani and Jon Ogborn*

87 Psychological aspects of learning about basic electricity in rural and urban classes
*Christoph v. Rhöneck and Karl Grob*

97 Students' concepts of force as applied to related physical systems: A search for consistency
*M. Finegold and P. Gorsky*

115 Concepts of health and illness in Thai children
*Pranee Rice*

**Vol. 13 No. 2 April–June 1991**

**Research Reports**

129 Learning to ask, listen, and analyse: using structured interviewing assignments to develop reflection in preservice science teachers
*Deborah J. Trumbull and Mary Johnston Slack*

143 Problem-solving processes used by students in organic synthesis
*Craig W. Bowen and George M. Bodner*

159 Students' reasonings in thermodynamics
*S. Rozier and L. Viennot*

171 Causal explanation of complex physiological concepts by medical students
*Vimla L. Patel, David R. Kaufman and Sheldon Magder*

187 Room for scientific thought?
*A. H. Johnstone and F. F. Al-Naeme*

193 The use of analogue models by students of chemistry at higher education level
*Angela M. Ingham and John K. Gilbert*

203 Performance based on instruction by lecture or by interaction and its relationship to cognitive variables
*William R. Robinson and Mansoor Niaz*

**Vol. 13 No. 3 July–September 1991**

**General Articles**

217 The potential of semiotics to inform understanding of events in science education
*A. Groisman, B. Shapiro and J. Willinsky*

227 Science education and philosophy of science: congruence or contradiction?
*Nicholas C. Burbules and Marcia C. Linn*

**Innovations and Developments**

243 Modelling in physics teaching: the role of computer simulation
*G. Andaloro, V. Donzelli and R. M. Sperandeo-Mineo*

**Research Reports**

255 Genetic epistemological notes on recent research into children's understanding of light
*Martin Monk*

271 The lower level biology matriculation (Bagrut) examination in Israel
*Pinchas Tamir and Dida Frankl*

283 The understanding of the properties of light by students in India
*A. B. Saxena*

291 In physics class, exercises can also cause problems...
*Samuel Johsua and Jean-Jacques Dupin*

303 Relationship between students' conceptual knowledge and study strategies–part 1: student learning in physics
*Elizabeth Hegarty-Hazel and Michael Prosser*

313 Pupils' representations of models of water
*Mariana P. Pereira and Maria Elisa M. Pestana*

321 Investigating a model of commonsense thinking about causes of motion with 7 to 16-year-old pupils
*Denise Whitelock*

341 Learning interactions in group work in science
*R. F. Kempa and Aminah Ayob*

355 The development of modules for the teaching of chemical equilibrium
*Amil C. Banerjee and Colin N. Power*

**Vol. 13 No. 4 October–December 1991**

**General Articles**

363 Newspaper science, school science: friends or enemies?
*J. Wellington*

373 'Of course, it's just obvious': adolescents' ideas of scientific knowledge
*Marie Larochelle and Jacques Désautels*

**Innovations and Developments**

391 Environmental education: the development of a curriculum through 'grass-roots' reconstructive action
*R. B. O'Donoghue and C. McNaught*

405 Changing science teaching: lessons from a long-term evaluation of a short in-service course
*Hilary Constable and Andrew Long*

**Research Reports**

421 Relationship between students' conceptual knowledge and study strategies—part 2: student learning in biology
*Elizabeth Hegarty-Hazel and Michael Prosser*

431 The interaction of cultural rituals and the concepts of science in student learning: a case study on solar eclipse
*J. K. Mohapatra*

439 Gender differences in science-lesson behaviours
*R. G. Hacker*

447 The STS outlook profiles of Israeli high-school students and their teachers
*David Ben-Chaim and Uri Zoller*

459 A label as a hidden persuader: chemists' neutralization concept
*Hans-Jürgen Schmidt*

473 Improvement of reading comprehension of physics texts by students' question formulation
*Adina Koch and Shulamith G. Eckstein*

487 Misconceptions of students and teachers in chemical equilibrium
*Anil C. Banerjee*

**Vol. 13 No. 5 1991**

**Special Issue:**
**Informal Sources for Learning Science**

**Introductory Paper**

495 'Info-tainment' and informal sources for learning science
*A. M. Lucas*

**Museums, Aquariums and Science Centres**

505 More than a field trip: science programmes for elementary school groups at museums
*Sabra Price and George E. Hein*

521 The long-term impact of interactive exhibits
*John Stevenson*

533 Interacting with a science museum exhibit: vicarious and direct experience and subsequent understanding
*Aubrey Tulley and A. M. Lucas*

543 Impact of research on the approach to the visiting public at the Natural History Museum, London
*Roger Miles and Alan Tout*

551 Conceptual change and killer whales: constructing ecological values for animals at the Vancouver Aquarium
*Elin Kelsey*

561 Education, research and passive recreation: an integrated programme at the Wetlands Centre, Shortland
*Max Maddock*

569 The Interactive Science and Technology Project: the Nuffield Foundation's Launchpad for a European Collaborative
*Melanie Quin*

**Printed Media**

575 Does science get the press it deserves?
*Tom Wilkie*

583 Packaging science for a reference series
*Bernard Dixon and Lawrence Clarke*

**Science Clubs**

589 Science clubs – the extra dimension
*Ross Kingsland*

**Concluding Comment**

597 'But where are the Cossacks?': An alternative strategy for popularization
*Pierre Fayard*
